Highly sensitive becomes highly secure.
With SINA systems from secunet.

Classified data need the best protection you can get – and this, of course, doesn't stop at frontiers. secunet is one of the leading companies when it comes to IT security for armed forces. Our SINA systems, for example, are especially designed for high-security networks and will give you data security up to NATO SECRET level. And, as your general defence strategy is one of the best, why should your data defence be anything less?

IT security made in Germany.
