STIM210 is a small, lightweight Three Axis Gyro Module for accurate pointing and stabilization, flight control and guidance applications.

- ITAR free
- Small size, low weight, power and cost
- Insensitive to magnetic fields
- Low gyro bias instability (0.3°/h)
- Low gyro noise (0.15°/√h)
- Excellent performance under vibration and shock
- Available in 1, 2 or 3 axes
- Fully calibrated and customer configurable to the specific application
- Weight 55 grams, volume <2cu.in, power 1.5 W

STIM210 is field proven in **Missile systems, Target acquisition systems, Airborne surveillance, DIRCM, Remote Weapon Systems, Launch vehicles, Military Land navigators and Satellites.**

When size, performance and robustness matter
